# **Weather Monitoring**

Hera Resources Pty Ltd (the Company), a wholly owned subsidiary of Aurelia Metals Limited, owns and operates the Hera Mine. The Company has one licenced weather station (licence point 23) associated with the mine (Figure 1). A summary of the licence conditions (Environmental Protection Licence (EPL) 20189) associated with this point is presented in Table 1.

**Figure 1.** Location of the licence points associated with Gold Room Stack monitoring (Licence Point 24 and Licence Point 39), blast monitoring and meteorological monitoring (Licence Point 23).

Table 1. Summary of EPL 20189 conditions associated with the licensed weather station.

| Parameter             | Frequency  |
|-----------------------|------------|
| Air Temperature (°C)  | Continuous |
| Wind Direction (°)    | Continuous |
| Wind Speed (m/s)      | Continuous |
| Sigma Theta (°)       | Continuous |
| Rainfall (mm)         | Continuous |
| Relative Humidity (%) | Continuous |

Meteorological monitoring is conducted on a continuous basis. Table 2 is a summary of the data collected by the weather station this month. Figure 2 is a wind rose for the month.

**Table 2.** Summary of meteorological data for the month.

| Pollutant             | No. of measurements for month | Min. value | Mean value | Median value | Max. value |
|-----------------------|-------------------------------|------------|------------|--------------|------------|
| Air Temperature (°C)  | Continuous                    | -7.21      | 7.81       | 9.26         | 22.27      |
| Wind Speed (m/s)      | Continuous                    | 0.00       | 1.67       | 1.06         | 9.01       |
| Sigma Theta (°)       | Continuous                    | 1.97       | 23.56      | 18.25        | 103.70     |
| Rainfall (mm)         | Continuous                    | 0.00       | 0.00       | 0.00         | 0.20       |
| Relative Humidity (%) | Continuous                    | 16.41      | 61.76      | 63.59        | 96.71      |

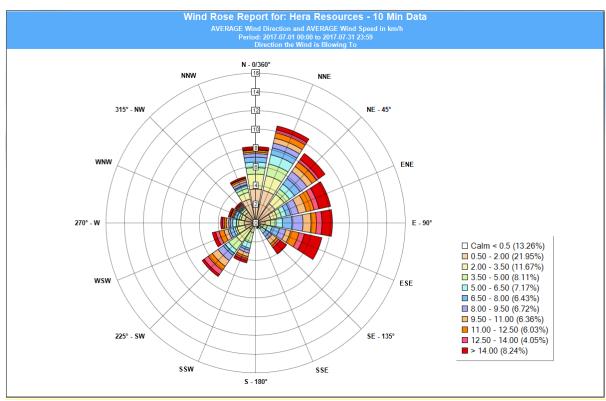

Figure 2. Wind rose for the month.

## **Surface Water Monitoring**

The Company has six licence points associated with surface waters. Four of these points are located within the Mining Lease (Figure 3) and two are located on Box creek, upstream and

downstream of the mining lease (Figure 4). A summary of the licence conditions associated with these licence points is presented in Table 3.

**Figure 3.** Licensed surface water monitoring points located onsite.

**Figure 4.** Licensed surface water monitoring points located offsite. The black outline represents the mining leases.

 Table 3. Summary of EPL 20189 conditions associated with licensed surface water monitoring points.

| EPA ID No.                   | Monitoring Frequency                  |                               |
|------------------------------|---------------------------------------|-------------------------------|

## **Groundwater Monitoring**

The Company has 17 licence points associated with groundwater. These points are located around the Project Area (Figure 5) and are a combination of observation bores, productions bores and piezometers. A summary of the licence conditions associated with these licence points is presented in Table 5

Figure 5. Licensed groundwater and air quality monitoring points.

**Table 5.** Summary of EPL 20189 conditions associated with licensed groundwater monitoring points.

|  | Monitoring Frequency                         |
|--|--|

|  | рН   |

Quarterly groundwater results were reported in Jun 2018.

## **Noise Monitoring**

The Company has four licenced monitoring points (R1, R2, R3 and R4) located along the Burthong Road (Figure 6). The locations are strategically placed near the Hera Mine's nearest neighbours. R1 and R2 are measured from the same point as both neighbours are

located in very close proximity to each other. A summary of the EPL and Project Approval (PA) conditions associated with these licenced points is presented in Table 6.

**Figure 6.** Licensed noise monitoring locations. The black outline represents the Mining Lease areas.

Table 6. Summary of EPL 20189 conditions associated with noise monitoring.

| Location       | Pollutant - Noise                               | Limits                            |
|----------------|---|-----------------------------------|
| R1, R2, R3, R4 | Monday to Friday - 0700 hours (hrs) to 1800 hrs | LAeq (15 minute) 35 decibels (dB) |
|                | Monday to Friday - 1800 hrs to 2200 hrs         | LAeq (15 minute) 35 dB            |
|                | All other times                                 | LAeq (15 minute) 35 dB            |
|                |   | LA1 (1 minute) 45 dB              |

An independent consultant (EMM Consultants) was engaged to conduct a noise assessment in July 2017. The results were reported in the July 2017 Environment Report.

# **Blast Monitoring**

The blast monitor is located adjacent to the dwelling on the nearest neighbour's property (Figure 1). A summary of the EPL and PA conditions associated with this licenced point are presented in Table 7.

Table 7. Summary of EPL 20189 and PA 10\_0191 conditions associated with blast monitoring.

| Location   | Pollutant                 | Time Period                  | Limits               |
|------------|---------------------------|------------------------------|----------------------|
|            | Ground vibration          | All times                    | 10 mm/s (max.)       |
| Blast      |                           | Day                          | 5 mm/s (95% of total |
| monitoring | (monitor for every blast) |                              | blasts)              |
|            |                           | Evening                      | 2 mm/s (95% of total |
|            |                           |                              | blasts)              |
|            |                           | Night and all day on Sundays |                      |
|            |                           | and Public Holidays          | 1 mm/s (max.)        |
|            | Airblast overpressure     | All times                    | 120 dB (max.)        |
|            |                           | All times                    | 115 dB (95% of total |
|            | (monitor for every blast) |                              | blasts)              |

The Company conducted a total of 69 blasts this month. The characteristics of each blast are presented in Table 8. No exceedances were recorded for the month.

**Table 8.** Summary of blast monitoring results for the month.

| Date                    | Time  | Time period | Vibration (mm/s) | Overpressure (dB) |
|-------------------------|-------|-------------|------------------|-------------------|

### **Air Quality Monitoring**

The Company has two High Volume Air Samplers (HVAS), designed to sample Particulate matter less than 10  $\mu$ m (PM<sub>10</sub>) or Total Suspended Particulate (TSP) matter and two Dust Deposition Gauges (DDG). Refer to Figure 5 for location of the sampling points. A summary of the PA conditions associated with these monitoring points is presented in Table 9.

Table 9. Summary of Project Approval conditions associated with dust monitoring.

| Pollutant        | Averaging Period | Limits                                    |
|------------------|------------------|---|
| TSP              | Annual           | 90 μg/m³                                  |
| PM <sub>10</sub> | Annual           | 30 μg/m³                                  |
| PM <sub>10</sub> | 24 Hour          | 50 μg/m³                                  |
|                  | Annual           | 2 g/m <sup>2</sup> /month (Max. increase) |
| Deposited Dust   | Annual           | 4 g/m <sup>2</sup> /month (Max. total)    |

Results for air quality monitoring conducted this month have been summarised in Table 10.

One exceedance was recorded this month. The exceedance occurred on 18 Jul 2018 and was most likely caused by background conditions as reported in the Jul 2018 DustWatch Report which indicated July 2018 was the dustiest July on record.

**Table 10.** Summary of air quality monitoring results for the month.

| Pollutant             | Unit       | Limit | Averaging<br>Period | Result |
|-----------------------|------------|-------|---------------------|--------|
| TSP                   | μg/m³      | 90    | Annual              | 49.53  |
| PM-10 (μg/m³)         | μg/m³      | 30    | Annual              | 25.33  |
|                       | μg/m³      | 50    | 6/07/2018           | 47.00  |
|                       | μg/m³      | 50    | 12/07/2018          | 10.00  |
|                       | μg/m³      | 50    | 18/07/2018          | 152.00 |
|                       | μg/m³      | 50    | 24/07/2018          | 24.00  |
|                       | μg/m³      | 50    | 30/07/2018          | 10.00  |
|                       | μg/m³      | 50    | Annual              | 2.17   |
| Deposited Dust (DDG1) | g/m²/month | 4     | Annual              | 1.95   |

### **Gold Room Stack Monitoring**

The Company has two licenced gold room stack monitoring points (Figure 1). A summary of the licence conditions associated with this licence point is presented in Table 11.

Table 11. Summary of EPL 20189 conditions associated with gold room stack monitoring.

| EPA ID No. | Monitoring Frequency |  |
|------------|----------------------|--|
| 24         | Yearly               |  |
| 39         |                      |  |
|            | Pollutant            |  |
|            | Nitric Oxide (mg/m³) |  |

Gold Room stack monitoring is conducted on an annual basis. The results from this monitoring were reported in August 2017.

#### **Concentrate Transport**

The Company is licenced to transport 50,000 tpa of lead/zinc concentrate between 0700 and 2200. The company is limited to eight truck movements per day (entering and leaving the site) averaged over a calendar month. A summary of concentrate haulage operations is presented in Table 12.

**Table 12.** Summary of the concentrate truck movements from the Hera Mine to Hermidale rail siding for the month.

| Date       | Time     | Dry Tonnes |
