#### MONTHLY ENVIRONMENTAL MONITORING SUMMARY

#### 1. INTENT

This monthly environmental summary report is a requirement under section 66(6) of the NSW Protection of the Environment Operations Act 1997 (POEO Act), in which holders of an environment protection licence make their pollution monitoring data publicly available. This report is intended to keep the community, stakeholders, and regulators informed of Peak Gold Mine's (PGM's) environmental performance and to maintain a transparent and accountable reporting system.

### 2. SCOPE

This report covers all of PGMs environmental monitoring conditions covered for September 2018. These conditions, where applicable, are measured against PGMs Environmental Protection Licence (EPL), development consent conditions and Australian Standard to determine PGMs compliance. The conditions include;

- · Blasting monitoring results;
- · Air Quality Monitoring results;
- · Noise Monitoring results;
- Surface Water Monitoring results; and
- · Weather Conditions.

### 3. DEFINITIONS

mm/s - the peak of the vibration in millimetres per second

Insoluble Solids – the insoluble portion of the dust deposition

Total Lead – Including dissolved lead in the liquid portion and the lead particulates in the filter paper following laboratory analysis

g/m2/month - grams per square meter per month

dB (L) – decibel (linear maximum)

dB LAeq (15 minute) - Decibel (linear weighted average over 15 minutes)

CN Free – Free Cyanide (hydrogen cyanide and cyanide ions in solution)

CN WAD – Weak Acid Dissociable Cyanide (includes cyanide species liberated at moderate pH of 4.5)

TSS - Total Suspended Solids

# 4. MONITORING RESULTS

### 4.1. VIBRATION

The vibration monitoring results displayed in Table 4.1a represents all blast vibration events that were trigged at the New Occidental, Fort Bourke and/or Dellavale monitors (Figure 1).

MONTHLY ENVIRONMENTAL MONITORING SUMMARY

As seen in Table 4.1a all blasting events for the month were below PGMs EPL limits. Vibration limits set by the NSW Environmental Protection Authority (EPA) can be viewed in Table 4.1b.

The compliance against the overall 12-month period will be reported in the EPL Annual Return and Annual Environmental Management Report (AEMR).

Table 4.1a New Occidental, Fort Bourke and Dellavale Vibration Results

Location	Date Sampled &	ID	New Occidental	Fort Bourke	Dellavale (mm/s)	Complies
	Received		(mm/s)	(mm/s)		(Y/N)
Peak	6/09/2018	8810StpMainS511	No Trigger	No Trigger	No Trigger	Υ

**Table 4.1b PGM EPL Limits** 

Peak Particle Velocity (mm/s)	Allowable Exceedance
5.00	<5% of the total number of blasts in a 12 month period are to be below
	5mm/s
10.00	NIL

Figure 1: Location of Vibration Monitors on PGM's Mining Leases.

# 4.2. AIR QUALITY

Fall out dust deposition bottles are currently used to monitor air quality. The bottles are positioned in the field (Figure 2) for a period of 30  $\pm$  2 days. Monitoring is undertaken quarterly. The bottles are then sent to Australian Laboratory Services (ALS) for external analysis.

PGM has no set limits for air quality monitoring levels. However, takes on board the EPAs best practice limit of  $4g/m^2/time$  (limit is applicable to 12 month averaging period). If a single monitoring result is over the EPAs best practice limit of  $4g/m^2/time$ , the cause is investigated and reported in the AEMR.

No dust monitoring was undertaken during the month of September 2018.

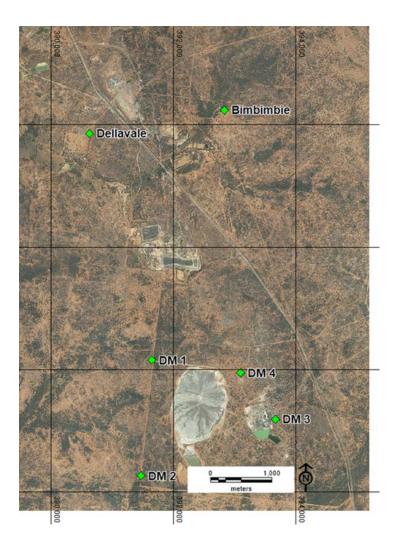

Figure 2: Location of dust gauges on PGM Mining Leases.

## **4.3. NOISE**

A hand-held monitor is used by PGM employees to monitor noise levels at times set out by the EPL and development consent conditions. Noise monitoring is conducted at the closest resident (figure 3) and sporadically depending on operational requirements. PGMs closest monitoring point is located at the Dellavale boundary, approximately 400m closer to the mine noise than the residence. To determine the noise level (dB) experienced at the residence, sound intensity I and the inverse square law  $1/r^2$  is calculated based on the residences distance from mine noise source.

Noise monitoring results and licenced noise limits set by the EPL and Development Consent Conditions are given in Table 4.3a respectively.

**Table 4.3a Attended Noise Monitoring Results** 

Location	Da Sampled & Obtained	ate Published	Time	LA 10 (dB) Limit	LA 10 (dB) Monitoring Result at Monitor Location	LA 10 (dB) Calculated Monitoring Result at Residence	Key Noise Source	Complies
Dellavale	24/9/2018	25/9/2018	3:19pm	45	36.9	32.92	Wind, Bird Chirp, Rock Dumping at New Cobar	YES

Table 4.3b Noise Monitoring

Time Band	Day	Noise Level (dB)
8:00am - 6:00pm	Mon – Fri	45
6:00pm - 10:00pm	Mon – Fri	40
10:00pm - 8:00am	Mon – Fri	35
8:00am - 1:00pm	Sat	45
1.00pm - 8:00am	Sat	35
12:00am - 12:00pm	Sun	35

5

Yes

### **4.4. WATER**

Surface water monitoring involves collecting water samples from a number of locations around site and submitted to external laboratory for physical and chemical analysis, pH and electrical conductivity are obtained using a handheld monitor. Table 4.4 gives the results as per the PGM EPL requirements.

Received Published Limit WAD CN CN Free Complies Point Sampled Oil & (mg/L) (mg/L) (mg/L)Grease Recycled No 20/9/2018 2/10/2018 18/10/2018 < 0.004 < 0.004 48 Yes Water Dam Limit End (Peak) Raw Water No 20/9/2018 2/10/2018 18/10/2018 < 0.004 < 0.004 < 5 Yes Tank (Peak) Limit No
